

Jira Report

Summary

Public S3 Bucket

Decision

PredatorAI recommends mitigate with priority medium.

Risk

Priority: MEDIUM

Recommended Action: mitigate

Risk Score: 60/100

Confidence: 95% (very_high)

Why this matters

- === PredatorAI Decision Summary ===

- PredatorAI identified 4 supporting attack indicators and estimated the exploitation probability as High.

-

- Attack Vector:

- External Attack Surface

-

- Supporting Factors:

- - The affected asset is exposed to the Internet.

- - The source system rated the finding as high severity.

- - The affected asset has high business criticality.

- - MITRE ATT&CK context is available for the finding.

-

- Limiting Factors:

- - No supporting threat intelligence is currently available.

- - Detection coverage may reduce attacker dwell time.

-

- Likely Outcomes:

- - Successful exploitation may result in significant security impact.

-

- Business Impact:
- Compromise of this asset would have a significant business impact.
-
- Confidentiality: Medium
- Integrity: High
- Availability: High
- Operational: High
- Financial: Medium
- Regulatory: Possible
- Reputational: Medium
-
- Decision Confidence: 95%
- Confidence Level: very_high
-
- Confidence Factors:
- - Vendor severity information is available.
- - Asset criticality information is available.
- - Exposure information is available.
- - Detection coverage information is available.
- - MITRE ATT&CK context supports the decision.
-

Attack Reasoning

PredatorAI identified 4 supporting attack indicators and estimated the exploitation probability as High.

Attack Vector: External Attack Surface

Exploitation Probability: High

Supporting Factors:

- The affected asset is exposed to the Internet.
- The source system rated the finding as high severity.
- The affected asset has high business criticality.
- MITRE ATT&CK context is available for the finding.

Limiting Factors:

- No supporting threat intelligence is currently available.
- Detection coverage may reduce attacker dwell time.

Business Impact

Compromise of this asset would have a significant business impact.

Business Service: Business Critical Service

Asset Criticality: HIGH

Operational Impact: High

Financial Impact: Medium

Regulatory Impact: Possible

Recommended Actions

1. Restrict Internet Exposure

Remove or limit external access until remediation has been verified.

Action: mitigate

Priority: critical

Target Time: 4 hours

Verification:

- Verify the service is no longer Internet reachable.

2. Validate Remediation

Confirm that the finding is fully resolved after mitigation.

Action: investigate

Priority: medium

Verification:

- Re-run scan.

- Confirm finding closure.

Evidence

- asset: asset_name = Public S3 Bucket
- business_context: owner = Storage Team
- business_context: criticality = HIGH
- exposure: internet_exposed = True
- control: detection = True
- threat_intelligence: threat_intel = False
- attack_path: mitre = Collection
- business_context: sla_days = 14

Definition of Done

- Required remediation has been implemented.
- Verification steps have been completed.

- The finding has been rescanned or manually validated.
- Residual risk has been documented.
