

Soc Report

Finding: Wiz Finding

Priority: CRITICAL

Recommended Action: REMEDIATE_NOW

Attack Assessment

PredatorAI identified 6 supporting attack indicators and estimated the exploitation probability as Very High.

Attack Vector: External Attack Surface

Exploitation Probability: Very High

Supporting Factors

- The affected asset is exposed to the Internet.
- Threat intelligence indicates active or relevant exploitation context.
- The source system rated the finding as critical.
- The affected asset is classified as business critical.
- Detection coverage is missing or insufficient.
- MITRE ATT&CK context is available for the finding.

Likely Outcomes

- Successful exploitation may result in severe system compromise.
- Compromise may cause high operational and business impact.
- The attacker may gain additional dwell time.

Recommended Actions

[CRITICAL] Restrict Internet Exposure

Remove or limit external access until remediation has been verified.

Verification:

- Verify the service is no longer Internet reachable.

[HIGH] Investigate Threat Intelligence

Validate whether active exploitation affects this finding.

Verification:

- Review SIEM events.
- Review EDR telemetry.

[HIGH] Improve Detection Coverage

Deploy monitoring and alerting before remediation is completed.

Verification:

- Generate a test alert.
- Verify telemetry reaches the SIEM.

[CRITICAL] Immediate Remediation

Business critical asset requires immediate remediation.

Verification:

- Apply mitigation.
- Run validation scan.

[MEDIUM] Validate Remediation

Confirm that the finding is fully resolved after mitigation.

Verification:

- Re-run scan.
- Confirm finding closure.

Decision Confidence: 100% (VERY_HIGH)
